

To: FormsNet2 Transplant Center Users, AGNIS Beta Site Users

From: Barb Kramer
AGNIS Project Manager, NMDP Bioinformatics

Date of Release: 3/18/2009

Subject: AGNIS® Release 1.2.0

Release notes relevant to the National Marrow Donor Program® AGNIS® application version 1.2.0 are now available. These notes provide details on changes to curated forms, AGNIS Data Submissions Procedures, submission of mandatory forms, and the AGNIS Client. Details explaining these modifications are outlined below, where applicable.

New Features

The following features were added in this application release, resulting in specific benefits to center.

- A.** The following fully curated forms are available through Form Builder:
1. 2004 - Infectious Disease Markers: 2630454v6.0
 2. 2005 - Confirmation of HLA typing: 2626421v4.0
 3. 2006 - Hematopoietic Stem Cell Transplant (HSCT) Infusion: 2798767v1.0
 4. 2400 - Pre-Transplant Essential Data (TED): 2492857v5.0
 5. 2450 - Post-Transplant Essential Data (TED): 2792764v3.0
 6. 2900 - Recipient Death Data: 2481311v2.0
 7. 2111 - Acute Lymphoblastic Leukemia Post-HSCT Data: 2627437v3.0
 8. 2110 - Acute Myelogenous Leukemia Post-HSCT Data: 2763719v3.0
- B.** Full support for submission of curated data in XML format via AGNIS for the following forms:
1. 2004 - Infectious Disease Markers: 2630454v6.0
 2. 2005 - Confirmation of HLA typing: 2626421v4.0
 3. 2400 - Pre-Transplant Essential Data (TED): 2492857v5.0
 4. 2450 - Post-Transplant Essential Data (TED): 2792764v3.0
 5. 2900 - Recipient Death Data: 2481311v2.0

The data for these forms is stored in FormsNet2 via the AGNIS interface

Restored Functions

- A.** Not Applicable

Other Software Impacted

- A.** FormsNet2 is also impacted. See the Release Notes for FormsNet2 Release 2.7.2.

Business Impact

- A.** Transplant centers can submit supported forms to FormsNet2 through the AGNIS service.

AGNIS, 1.2.0,
